Figure 1 consists of seven histograms, labeled (a) through (g), showing the distribution of the number of non-zero elements in the vector x for different values of n . The histograms are arranged vertically. The x-axis for all histograms is 'Number of non-zero elements' ranging from 0 to 100. The y-axis is 'Frequency' ranging from 0 to 10. The histograms are labeled (a) through (g) and correspond to $n = 10, 20, 30, 40, 50, 60, 70$ respectively. As n increases, the distribution becomes more concentrated around 50 non-zero elements.
